Data Recovery Software Makes it Easier to Retrieve Your Data

Data loss is inevitable. There are several causes of data loss, but the most common factors are hard drive failures, deleting files accidentally, computer viruses and malware, power failures, theft of hardware, and accidental damage from spilled coffee or water. We've all experienced data loss in some form or another - along with the overwhelming feeling of panic and confusion that results in not being able to retrieve our sensitive data.

At Pavelcomm, we implement the best data recovery software to help you retrieve lost data with ease. Allowing you to work with peace-of-mind and maintain productivity even during times of disaster or human error.

What is Data Recovery Software?

Data recovery software is exactly what it sounds like - software that retrieves deleted, lost, or destroyed data. We've established that data loss is inevitable, but if you're not convinced, take a look at these surprising data loss statistics:

- Every week 140,000 hard drives crash in the United States
- 31% of PC users have lost all of their files due to events beyond their control
- About 70% of business people have experienced (or will experience) data loss due to accidental deletion, disk or system failure, viruses, fire or some other disaster
- 93% of companies that lost their data center for 10 days or more due to a disaster filed for bankruptcy within one year of the disaster
- 60% of companies that lose their data will shut down within 6 months of the disaster

“Data loss can be catastrophic for your business, resulting in downtime, liabilities, and a tarnished reputation. Don’t let your business go under due to negligence or a “it won’t happen to me” attitude.”

Why do I Need Data Recovery Software?

Think of data recovery software as the failproof option for times when you lose valuable information. Data loss can be catastrophic for your business, resulting in downtime, liabilities, and a tarnished reputation. Don't let your business go under due to negligence or a "it won't happen to me" attitude. Data recovery software is the solution that always works, even after you've tried everything else to retrieve lost data. Save yourself the time of looking through your entire inbox for a copy of a file you may have emailed someone else, digging through your recycle bin countless times, or checking other computers to locate your missing file - with data recovery software, you can get your misplaced or destroyed files back instantly and without hassle.

The Benefits of Data Recovery Software

At Pavelcomm, we want to provide you with easy-to-use data recovery software that keeps your business's productivity at an all-time high. We'll help you fight against the consequences of data loss to keep your business up-and-running despite any accidents, disasters, corruption, or failures. Contact us today to get started!
